

Dear Hiring Manager,

I am delighted and proud to recommend Mr. Mitra Boga for the computer science-related internship opportunity with your well-reputed tech organization.

I am Dr. Giddaluru Soma Sekhar, Associate Professor, Department of Computer Science, GITAM (Deemed to be University). As his faculty, I taught him Data Structures (CSEN2001). I can most certainly vouch for his academic and interpersonal prowess.

Mitra possesses the intellect, logical thinking, creativity, adaptability, communication, attention to detail and analytical expertise required to excel in any Engineering role. I appreciate his keen interest in Engineering, Software Development, and Emerging Technologies. It is his inherent resilience that allowed him to perform strongly in this tough subject. He not only shows a great grasp of theoretical knowledge but also applies his acumen via Case Studies and Projects and takes Coursera courses on Algorithms (Princeton Algorithms I/II) to further enhance his knowledge.

During his time as my student, he has consistently demonstrated excellent performance in concepts such as Searching and Sorting, Linked Lists, Stacks and Queues, Graphs and Trees, and Algorithms (e.g. Dijkstra's).

As an aspiring Software Engineer, the internship at your organization would provide Mitra Boga with an opportunity to showcase and improve upon his natural talents and allow you to practically experience what Mitra has learnt theoretically. I am sure he will prove to be an asset to your organization and will prove his talent. I confidently endorse Mitra's application without any reservations.

*Dr. Giddaluru Soma Sekhar, Ph.D, Data Structures,  
Associate Professor, Department of Computer Science,  
School of Technology, GITAM University,  
Hyderabad, INDIA*
